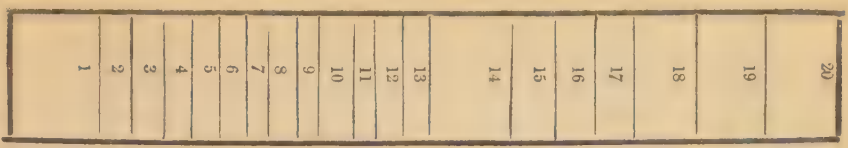
INTRODUCTION.

APART from the attraction of artistic taste, associated with the study of ancient coins, is the general utility of Numismatic knowledge, when applied to verify the events of history and to illustrate early records of the migrations, mythology, and manners of those interesting races of men who, in the course of time and the revolutions of kingdoms, have become either a great or a civilized people. The Coins of Parthia, Bactria, Indo-Scythia, and the Sassanians of Persia, are the only vivid illustrations of the obscure period of early Indian History, and the remote connection of tribes dwelling Westward and Eastward of the River Indus, and more particularly of that historical interval between the downfall of the Seleucidan Empire in the East, to the origin of the first Canoge Hindoo kingdom, when Indian History was obscured by the substitution of fabulous exaggeration for true narrative, and Brahminical fraud gave to the Puranic legends of the Hindoos their character of cunningly devised mythological fables.

The Coins composing this Collection present interesting types and varieties in the leading series of Greek, Roman, Gothic and Mahomedan History. As the Collection was chiefly made for the purposes of historical illustration and archæological research, it is rich in interesting and rare specimens illustrative of the early connection which appears to have existed between Eastern Persia and Western India.

The Greek series includes some beautiful and scarce specimens, in Gold and Silver, of the Macedonian, Egyptian,

Seleucidan, Bactrian, and Parthian Kings; some of the Tetradrachms of the last bear rare and inedited dates, and are valuable, though a rapid retrogression in monetary art is very apparent on the coins at this period. The Syracusan Medallion is of admirable execution, and almost matchless beauty. The Roman suite in Gold contains many of great perfection and rarity, formerly in the renowned Pembroke collection. The Mahomedan series of Indian Gold Coins rival most others known; similar can only be found scattered among very select cabinets. The Bactrian and Surasthran specimens are in a far better state of preservation than usual, and contain in general perfect Bilingual inscriptions, which renders them highly valuable; some, perhaps, may be justly termed "unique." The whole are of great interest to the historical and archæological investigator, as well as to the "numismatic public." These remarks might be easily extended, but sufficient has been said for those who delight in numismatography, and to answer our immediate purpose. May we be permitted to add, that we feel it an honourable distinction to have been entrusted with the cataloguing of this important Collection.



Scale of Mionnet, to whose well known works the references are chiefly made.
